

Microsoft Artificial Intelligence

Embrace the digital revolution.

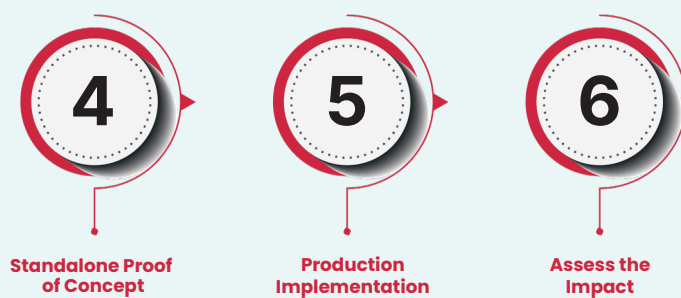

Talk to us if you want help to assess how **Microsoft AI services can be used to help your business**. Whether you want to gain insights from your data using **AI Analytics**, use Natural Language Bots to help reduce call center volumes, automate mundane tasks, predict outcomes, recommend products or increase efficiency by using or adding **AI Copilot** features to your company's digital products, we are here to advise, guide and if you want us to, implement AI solutions for you. We can accelerate and de-risk your AI journey. Our standard approach is shown below but we can also **deliver custom journeys to meet specific needs, feel free to ask AI@tekenable.com**.

AI Accelerator with TEKenable

Phase 1

Phase 2

Why TEKenable?

TEKenable has achieved Microsoft Azure Advanced Specialisations in Migration of Enterprise Apps to Microsoft Azure, AI and Machine Learning and has three solution designations - Azure Digital & App Innovation, Azure Data & AI and Business Applications; and are proud to have been awarded two Microsoft Partner of the Year Awards 2024 for Business Central and Building with AI. We also boast three ISO certifications namely ISO9001 for quality management, ISO27001 for cybersecurity, and ISO13485 for the medical device industry, underscore our commitment to international standards.
